

CRITICAL THINKING

Dr. Augros

Course Description

This course might be subtitled, “Adventures in Philosophical Discovery.” What can we know? And how can we prove we know it? Have you ever heard someone say something you knew was false but did not know what to say in response? If so, you need *Critical Thinking*. This course will teach you how to use the logical tools used by all the greatest thinkers.

In anonymous course evaluations, students who took this class wrote:

“It strengthened my ability to read and analyze a text.”

“I am now noticing logical tools in readings for my other classes.”

“The course readings were engaging.”

“On many topics, I advanced from right opinion to true knowledge.”

“I found arguing for the false side of an issue and then refuting the false side to be very helpful.”

“I feel so much better equipped to argue now and come to significant conclusions with certainty.”

“I can much more easily see flaws in faulty arguments and much more strongly support my own points than I could before I took this class.”
